Veteran Homelessness Overview

- Two years since the release of Opening Doors, with goal of ending Veterans homelessness by 2015

- Progress towards the goal: 12% decrease in Veterans homelessness from 2010 – 2011 overall. In some places, decrease as high as 20%

- 67,000 Veterans experiencing homelessness in America – action and sense of urgency still needed to achieve our goal

- Partnering to unlock resources will be key
The Way Forward

- HUD-VASH program led to progress and innovation – but it is just one of resources available for Veterans

- Key to effectively using the array of resources available:
  - Use a Veteran-centric approach
  - Partner strategically so that right interventions at right time are coordinated seamlessly among community partners
  - Set targets and measure results – so resources are put to highest and best use
